SUMMARY

Product builder who ships tested web products through AI-assisted development, backed by hands-on market research, brand positioning, and story-led marketing across a fashion startup, a hiring platform, and two nonprofits.

SKILLS

Research & Brand: Market and Competitor Research, Surveys, Brand Identity Development, Social Media Content Development, Content Strategy, Creative Direction, Storytelling, Creative Writing
Product Building (AI-assisted): TypeScript, JavaScript, React, HTML/CSS, Node.js/Express, SQL (SQLite)
Tools: Git & GitHub,VS Code, Microsoft Excel, Microsoft Word, Generative AI, Canva

WORK EXPERIENCE

Cnear (formerly Yoursthatsenior) ***Remote***
Marketing Intern ***Feb 2025 – Jun 2025***
- Researched hiring trends and in-demand skills across UI/UX, AI, and development roles to inform messaging
- Shaped recruitment-marketing and employer-branding copy around what candidates and recruiters look for
- Conceived the "Why Us / Trust Us" campaign to build candidate trust in the platform's hiring process

PawzzFoundation ***Remote***
Social Service Intern ***Feb 2025 – Mar 2025***
- Created awareness content supporting animal rescue, rehabilitation, and adoption campaigns
- Raised ₹1,500 in donor contributions through direct fundraising outreach

Muskurahat Foundation ***Remote***
Fundraising Intern ***Jul 2024 – Aug 2024***
- Wrote story-led social content on child hunger and malnutrition to encourage donor participation
- Secured ₹750 in contributions by running crowdfunding outreach

StyleSaga ***Ranchi, India***
Co-Founder & Creative Director ***Feb 2023 – Aug 2023***
- Co-founded a Gen-Z unisex streetwear brand; led brand identity, creative direction, and 75+ apparel concepts
- Mapped Gen-Z fashion preferences through student surveys and Instagram research
- Benchmarked Snitch, The Souled Store, Bonkers Corner, Zudio and Westside to define brand positioning

PROJECTS

OpenConverter | *TypeScript, Vite* ***Oct 2026 – Nov 2026***
- Built a privacy-first file converter that runs entirely in the browser, with no uploads, accounts, or server
- Converts images with target-size compression, audio/video to MP3/WAV, and TXT, Markdown, CSV, Excel, PDF
- Added on-device AI background removal (MediaPipe); validated by 19 Vitest unit and 16 Playwright browser test files

SQL Learner | *React, TypeScript, WebAssembly* ***Nov 2026 – Present***
- Built an interactive SQL course with 9 lessons, 15 auto-graded challenges, 3 quizzes, and progress tracking
- Runs real SQL in the browser using SQLite compiled to WebAssembly in a Web Worker, with a CodeMirror editor
- Grades answers by comparing result sets against reference queries; a Data Analyst learning path is in progress

Habit Tracker | *JavaScript, Node.js, Express* ***Sep 2026 – Oct 2026***
- Building a local-first habit tracker with a full-year completion heatmap, Pomodoro focus timer, and reminders
- Vanilla HTML/CSS/JS frontend served by an Express REST API that saves all data to a local JSON file

EDUCATION

BTech in Computer Science Engineering - Usha Martin University, Ranchi ***Oct 2022 – Jun 2026***
Led graphic design for the first-ever GDG (Google Developer Group) event at Usha Martin University, creating posters, banners, and social creatives for AI, Generative AI, and coding events.

CERTIFICATIONS & ACHIEVEMENTS

- Cloud Computing – NPTEL (4 credits, 66%), Jan – Apr 2026
- Forward Program – McKinsey.org, Jun 2026
